

D NAVANEESH

PROFILE

As a Final-year Artificial Intelligence and Data Science undergraduate, I possess a strong foundation in programming, data analysis, and analytical problem-solving. Experienced in developing AI-driven applications, intelligent systems, and data analysis solutions through academic and hands-on projects. Passionate about leveraging Artificial Intelligence, Machine Learning, and data-driven technologies to solve real-world challenges and create impactful solutions. Eager to contribute innovative ideas, continuously learn emerging technologies, and grow in a dynamic and fast-paced professional environment.

PROJECTS

Solar Tracking System & Soil Moisture Monitoring using IoT:

IoT-based smart system that automatically adjusts solar panel orientation based on sun position and monitors soil moisture, providing real-time energy and environmental data through an IoT dashboard.

AI Resume Generator:

Automated resume generation system that converts user inputs from Google Forms into professionally formatted resumes using AI-driven document generation.

Web Scraping Automation:

Automated data extraction pipeline that collects structured information from websites using web scraping and Make.com workflow automation.

Univariate Exploratory Data Analysis of Mobile App Usage:

Interactive Streamlit application for performing univariate EDA and visualizing mobile app usage patterns using statistical and graphical analysis.

AI Code Explainer (Generative AI Tool):

Generative AI-powered application that analyzes and explains source code in multiple programming languages using Meta Llama 3 through OpenRouter APIs.

EV Battery Degradation & Fire Risk Monitoring System:

Machine learning and IoT-based monitoring system designed to predict EV battery degradation and detect potential fire risks for improved safety.

AutoPrepAI - Autonomous Data Cleaning & Feature Engineering Agent:

End-to-end automated data preprocessing pipeline that performs dataset profiling, intelligent cleaning, feature engineering, and baseline ML evaluation.

DocuSphere - Offline Intent-Aware RAG System:

Offline Retrieval-Augmented Generation system enabling document-based question answering with intent detection and accurate information retrieval.

SensoGuard - Device & Sensor Health Monitoring System:

Sensor monitoring platform that analyzes device health, detects anomalies, and provides alerts to ensure reliability of sensor-based systems.

INTERNSHIPS

ZGROW pvt Ltd- Completed an Internship with a focus on AI, ML, Cloud and Data Analytics in real-world business solutions. Got up a clear picture of how technical knowledge is used in industries and also understood the professional work environment. June-2025

MAIYYAM'S- Successfully completed an Internship program in recognition of their hard work and dedication their ambassadorship in Digital Marketing. July-2025

EDUCATION

B.Tech Artificial Intelligence and Data Science- Pursuing.

Dr, N.G.P. Institute Of Technology, Coimbatore

CGPA upto 5th semester : 7.96

HSC:

2023-2024

Kendriya Vidyalaya AFS Sulur, Coimbatore

SSLC:

2020-2021

Kendriya Vidyalaya AFS Sulur, Coimbatore

SKILLS

Technical Skills

- Python
- Java
- SQL
- Machine Learning
- Generative AI
- Data Analysis
- Exploratory Data Analysis (EDA)
- Data Cleaning & Preprocessing
- Feature Engineering

Professional Skills

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Project Management
- Time Management
- Leadership
- Effective Communication

LANGUAGES

- English
- Hindi
- Malayalam

AREA OF INTEREST

- Web Development
- AI Product Engineer
- Software Developer
- Generative AI Applications
- Python developer
- Product Support Engineer
- Intelligent Automation Systems
